

Dear

Thank you for attending our virtual gathering of leaders this Sunday 3/24 11AM PT. I assure you it will be a gathering of leaders for positive change!

The Zoom link will be shared via email only on Saturday.

This event is designed to give you and other participants an opportunity to introduce yourself and to share the work that you are passionate about. How may we support you with your Event, Project, Product, or Service to reach a larger audience?

The movement we are forming together, will link the best and most impactful training, coaching, books, podcasts, and organizations that have a vibration of love, compassion, authenticity, inclusion, and integrity with a vast grassroots network that reaches beyond the United States of America.

Your autonomy and individual branding will be strengthened through this process of co-creation and joyful collaboration.

We see significant potential for mutual benefit. As conscious and aware leaders we understand that we all have an integral piece of the puzzle. Therefore we need one another in order to realize our full potential for the good of our families, local communities, country & global communities.

The following list represents some, but not all, of the factors that we consider a priority:

- Creating Community Wealth that is sustainable and that offers equal access to all adult members of the community.
- Celebrating and Empowering Women Leaders.
- Balancing masculine and feminine energies within the human being.
- Healing the mind, body, soul and spirit through an integrated system based upon holistic systems and processes.
- Healing our relationships with Mother Earth.
- Instilling Personal accountability and responsibility.
- Providing new paradigm leadership models that completely replace hierarchical and patriarchal systems of aggression, domination, control and greed.
- Reimagining education as the process of bringing forth from within us, the wisdom of our own Soul.
- Inclusion.
- Integrity.
- Transparency.
- Truth.
- Centering work in community that serves to unite, build, and grow dynamic relationships and partnerships in service to the realization of the factors we have prioritized.

- Creating a hybrid business model that includes philanthropy and multiple streams of revenue from business enterprises.
- Improving quality of life.
- Prioritizing young people age 16-30
- Building bridges between Africa, the Mother of us All, and the United States of America, the melting of diverse peoples, for the purpose of healing and reconciliation and in support of eradicating poverty.

In service and love,

**Audrey Addison Williams**
